PROFESSIONAL SUMMARY

Data Analyst with strong experience in technical data management, analytics, reporting, and workflow improvement, supporting operational, engineering, and field environments. Proven ability to gather, clean, validate, integrate, and analyze structured and unstructured datasets to support decision-making, performance optimization, and risk reduction. Experienced in data governance, reporting automation, KPI tracking, system reliability analysis, and multidisciplinary collaboration, with exposure to project management, HSE systems, and technical operations. Adept at translating technical data into actionable insights aligned with business objectives..

CORE SKILLS

- SQL (Joins, Subqueries, Aggregations)
- Data Cleaning & Validation
- KPI Development & Tracking
- Requirement gathering and process mapping
- Excel / Google Sheets (Advanced formulas, Pivot Tables)
- Power BI & Data Visualization
- Reporting & Dashboard Development
- Data Accuracy & Quality Assurance
- Stakeholder-Focused Insight Presentation
- Project Coordination & Documentation

PROFESSIONAL EXPERIENCE

Associate Data Analyst

PM4Success International | 2024 – Present

- Analyzed Rivers State Local Government historical election data using SQL and Excel to identify voting patterns, party strongholds, and weak zones.
- Developed KPI-based reports that enabled party leaders to clearly understand high-performance wards vs underperforming areas, supporting targeted campaign strategies.
- Cleaned and validated multi-source datasets to improve reporting accuracy and decision reliability.
- Prepared periodic analytical summaries and visual reports for non-technical stakeholders.

Associate Project Manager (Data & Reporting Projects)

PM4Success International | 2025 – Present

- Supported planning, coordination, and execution of data-driven and reporting-focused projects across multiple stakeholders.
- Applied PRINCE2® methodology to manage timelines, risks, documentation, and deliverables.
- Tracked project KPIs, milestones, and progress using Excel-based reports and structured status updates.
- Coordinated communication between analysts, operations teams, and management to ensure alignment with project objectives.
- Integrated analytical insights into project reports to support evidence-based decision-making.

Operations Data Analyst / Field Engineer

NOVA Track Ltd | 2014 – 2024

- Analyzed GPS tracking system data to identify lapse intervals, signal delays, and reporting inconsistencies, improving system reliability.
- Created operational reports that highlighted performance gaps in GPS reporting time, supporting faster troubleshooting and service optimization.
- Ensured data accuracy across tracking logs, installation records, and operational datasets.

PROJECT EXPERIENCE

Car Sales Price Analysis

- Analyzed car sales datasets to determine likely selling prices based on mileage, brand, condition, and year.
- Used Excel and Python for data cleaning, exploratory analysis, and trend identification.

Insights helped car owners and dealers make data-driven pricing decisions and reduce underpricing/overpricing risks.

Biometrics Attendance & Payroll Analysis

- Designed an Excel-based biometrics attendance sheet to calculate total days present per staff.
- Automated attendance summaries used for accurate payroll computation, reducing disputes and manual errors.

Improved transparency and efficiency in attendance tracking and salary processing.

EDUCATION

- B.Sc. Computer Science (Second Class Upper)
Nnamdi Azikiwe University, Awka | 2021

CERTIFICATIONS

- PRINCE2® 7 Foundation – Project Management
- IBM Data Analytics Professional Certificate
- Google Data Analytics Professional Certificate

- Meta Data Analyst Professional Certificate
- Microsoft Business Analyst Professional Certificate

TOOLS

- SQL
- Excel
- Google Sheets
- Power BI
- Python (Pandas, NumPy)
- JIRA
- Confluence
- MIRO
- Ms Project
- Primavera
